**Colour For Today***

**SILVER**

The metal which corresponds to the Moon and the feminine energy! And in ancient times conveyed wealth and riches!

A powerful colour which can bring emotional, mental and physical balance. It is the colour of wisdom, sophistication (think grey-haired elders!!) and glamour!!

Silver is considered to be cleansing, illuminating & shows the way forward, especially when it comes to being open to new ideas!! If this colour is unbalanced with reds/browns then the wearer can experience mood swings and delusions via the Lunar cycles.

**Colour of the Day: White**

Is the lack of any color, while containing all colors. Since all colors are present, white does everything on all levels: physically, emotionally, mentally and spiritually. White is about purity, innocence, softness, illumination, release, brilliance, radiance, transcendence, merging with your higher power. In relation to the physical body, it is good for everything as the innate intelligence of the body will take whatever colors it needs. Resonates with all Chakras.

**Colour For Today**

***Red***

A very strong and noticeable colour, red is often used as a warning colour. It is, however also associated with lust, passion, energy, blood and war (hence why it is associated with Mars (planet and god!))

Red is an energising colour because it connects to our Root Chakra - our true connection to infinite energy and abundance! It can also stimulate the apatite (as it connects to our elimination organs)

You can balance out red with pink or white as too much red can be irritating!!

**Mars - Day - Tuesday**

The Red Planet - named after the Roman god of war. Its colour is due to the rusty iron oxide dust layer on its surface. Mars can be seen in the night sky (when it's close enough) with the naked eye glowing faintly red.

You can tap into the Mars energy when casting spells for protection, strength (mind & body), confidence and sexual encounters...

**Mercury Magick!!**

A simple way to ‘tune into’ Mercury’s energy (for enhanced communication, learning, perception or magickal prowess)

Firstly, use one or more of the crystals below to meditate with and get clear on your goal.

Then draw the symbol for mercury on your altar (or on the floor for added oomph!) using powdered erbs (choose from the list below) mixed together.

Ask Mercury to grant your goal (use your own words) whilst focusing on the symbol (or standing inside it)!

Then keep a record of your day in your BoFIS.

Crystals: Opal, Agate, Merlinite, Amethyst, Citrine

Eras: Wormwood, Valarian, Parsley, Elder, Lavender, Horehound, Dill

**Colour For Today***

***Grey***

Grey can be seen in different ways! - either as boring and depressing! OR as a colour of stability, and wisdom!! It IS neutral as it is the transition between two colours (black and white). It creates an atmosphere of calm as it is neither one colour or the other! And will balance out other colours (play down bright colours & big-up softer ones)

Whilst the colour grey may not be seen as particularly glamorous, it does provide a firm foundation from which to dispense your energies!

**Colour For Today**

***Black***

Often portrayed as being negatively-charged (think of words like 'blackmail', 'blacklisted', 'blackhole'), the colour black is an extremely powerful colour (or lack of!!) and conveys wealth and class (think of all the designer clothes that are made in black!!!) The colour black holds a mystery all of it's own as it is the colour of the hidden...the absence of all light.

It is the colour of power and control, and can prevent two-way communication because it is so powerful. It also absorbs negative energy - which is why it's a popular choice for Witches!!!

**SUNDAY**

**SUN-day**
The radiant light at the center of our system... without it there would be no life! It also represents our will to live, our vitality, consciousness & spirit. The Sun governs the individual mind, energy, willpower and in the body it is the Heart, Circulation & General Health. Without the cooling & moistening aspects of our Moon, the Sun would burn too harshly...and so the Sun (god) & Moon (goddess) work as One!

The colour of our Solar Plexus Chakra – the heart of our power! It is the brightest colour our eyes can see! And is full of joy and energy (it is, after all, the colour of our Sun!!) It is related to learning (logical side of the brain), communication, self-analysis, focus and memory recall. It also enables the speedy movement forward in life (which explains why it can cause anxiety in some people)
To balance out yellow, mix with a light green/orange to take the edge off!

I'm Angie! And, yes I am a Witch, High Priestess, Soundscape Artist! Published author!! and Teacher of all things Witchy/Occult

I have, since childhood, been fascinated by what's really going on in the world....the why's and wherefores!! And realised quite early-on that there was something Witchy inside!

In my early 20's I began studying Witchcraft and almost joined a coven! Confidence was not something I had back then, and I allowed pressure from friends stop me! Over the years, I dabbled, always learning, through different media, about the magick of the world around us! But, I always kept it to myself, out of fear of what other people would think!

Time and getting older has been my best friend in being able to fully embrace my Inner Witch without fear, and with a sense of empowerment! It is this empowered Inner Witch that I am helping YOU to uncover!

As part of my mission to educate and empower people about the REAL philosophy of Witchcraft I decided to get creative and build a way to learn online - so many times I hear about fledgling Witches being overcharged for being in a Coven, or the politics of a particular group, even knowledge being shrouded in secrecy! Exasperating!!!

My stance has always been one of share the knowledge, else the Craft dies!! The Path of Witchcraft is a series of 3 courses (from the Micro Course- Embrace you inner Witch, followed by a mini-course for The Curious Novice, to a more in-depth course which will take you even further into the depths of the Craft!

The courses are a part of the wiTChes Bazaar philosophy, but are a separate entity too :) Brightest Blessings on your journey
